

**HEY PREMIER EBY,  
STOP LNG  
FRACKED GAS  
EXPANSION IN BC!**

To: David Eby, Premier of British Columbia

► LNG is a fossil fuel. Methane is a greenhouse gas 30x more potent than carbon dioxide. LNG's climate pollution is as bad as coal.

► Fracking in B.C. must be stopped. The dangers to humans and the environment through air pollution, ground water contamination and earthquakes are too great.

► Taxpayer subsidies to oil & gas corporations must end. To date, the LNG Canada project alone has received \$6.5 billion in subsidies. This is money that should be spent on healthcare, education, housing, transit, and other social justice projects in B.C.

► Bill 14 & Bill 15 proposed and passed by your government are an attempt to circumvent existing laws and fast-track resource extraction projects in violation of environmental protections, Indigenous rights and title and the United Nations Declaration on the Rights of Indigenous Peoples. We stand with the B.C. Union of Indian Chiefs and others in condemning the enactment of Bills 14 and 15 and demand that it not be used to further the LNG expansion in the Province.

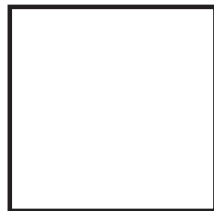

*By signing this postcard I am urging the government of British Columbia to stop LNG fracked gas expansion in B.C.!*

Signed,
